SURYA PRAKASH SIDDINA

+91-7569224221 — suryaprakashsiddina@gmail.com — LinkedIn — GitHub — LeetCode

Professional Summary

M.Tech candidate in Artificial Intelligence and Data Science, specializing in Machine Learning, Advanced Analytics, and Statistical Modeling. Hands-on experience in developing, validating, and evaluating ML models using Python and SQL. Skilled in solving data-driven business problems and collaborating with cross-functional teams to deliver scalable analytics solutions. Strong foundation in statistics, AI/ML concepts, and emerging areas including NLP and Deep Learning.

Education

Master of Technology in Artificial Intelligence and Data Science 2025–Present
Vellore Institute of Technology **GPA: 9.1**

Bachelor of Technology in Computer Science and Engineering 2021–2025
Rajiv Gandhi University of Knowledge Technologies (IIIT), Srikakulam **CGPA: 8.6**

XII: 9.42 CGPA — X: 9.8 CGPA

Technical Skills

Programming: Python, SQL, C
Core Concepts: Data Structures, Operating Systems, DBMS
ML & AI: Machine Learning, Deep Learning, NLP, Model Validation, Feature Engineering, GenAI, Large Language Models, Agentic AI
Statistics: Probability Distributions, Descriptive & Inferential Statistics, Multivariate Analysis, Matrix Algebra
Tools: Pandas, NumPy, Matplotlib, Tableau
ML Libraries: Scikit-learn, TensorFlow, PyTorch
Databases: MySQL
Other: Data Preparation, Model Evaluation, Business Analytics

Professional Experience

Data Science Intern May 2024 – June 2024
APSSDC (Remote)

- Built a sentiment analysis model on 8,000+ restaurant reviews using TF-IDF features and Python classifiers.
- Conducted EDA, visualized sentiment trends, and evaluated models using precision, recall, and F1-score.

Projects

Retrieval Augmented Generation with Summarization Chain 2025
LangChain, Groq LLM, ChromaDB

- Designed a RAG-based system for academic PDF question answering, improving answer relevance by 25%.
- Processed 300+ pages using vector embeddings and optimized retrieval pipelines, reducing latency by 30%.
- Implemented chunking and semantic search strategies to improve retrieval accuracy and efficiency.

Image-Based Text Extraction and Entity Recognition 2025
OCR, NLP, Machine Learning

- Developed an OCR-based system to extract and preprocess text from images for analysis.
- Implemented entity recognition to identify entity names and corresponding values from image-based text.
- Applied text cleaning, normalization, and rule-based matching to improve entity extraction accuracy.

The Skeptical Researcher – Multi-Agent AI System 2025
LLMs, Multi-Agent Systems

- Built a self-evaluating multi-agent AI system for structured research report generation
- Integrated source credibility scoring and bias-aware pro–con analysis for reliable, balanced outputs.
- Orchestrated agent collaboration and self-check mechanisms to enhance consistency and report quality.

Multiclass Image Classification 2025
Python, TensorFlow, Deep Learning

- Developed a Convolutional Neural Network (CNN) model to classify images into multiple object categories.
- Applied data preprocessing, augmentation, and feature extraction to improve model robustness.
- Analyzed model performance using metrics such as accuracy, precision, recall, and confusion matrix analysis.

Achievements

Qualified **GATE 2025** in Computer Science and Engineering

Certifications

Data Structures and Algorithms – GoClasses, Great Learning • Analyzing Data with Python – IBM • AI for Everyone – edX • Deep Learning – Simplilearn SkillUp • APSSDC Certification (Edunet)
