

SURYA PRAKASH SIDDINA

+91-7569224221 — suryaprakashsiddina@gmail.com — LinkedIn — GitHub — Portfolio — LeetCode — CodeForces

Professional Summary

M.Tech student in Artificial Intelligence and Data Science with strong foundations in Software Engineering, Python development, REST APIs, Git, and AI-powered application development. Experienced in building production-ready AI systems using LangChain, LLMs, vector databases, and backend services. Passionate about designing scalable software, debugging complex systems, and developing intelligent automation solutions with modern engineering practices.

Education

Master of Technology in Artificial Intelligence and Data Science Vellore Institute of Technology	2025–Present CGPA: 9.27
Bachelor of Technology in Computer Science and Engineering Rajiv Gandhi University of Knowledge Technologies (IIIT), Srikakulam	2021–2025 CGPA: 8.6
XII: 9.42 CGPA — X: 9.8 CGPA	

Technical Skills

Programming: Python, JavaScript (Basics), C
Web Technologies: HTML, CSS, Node.js (Basics), Bootstrap, jQuery
Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering, Feature Engineering, Model Evaluation
AI Engineering: LangChain, LLMs, RAG, Vector Databases
Databases: MySQL, ChromaDB
Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook, Google Colab
Libraries: Pandas, NumPy, TensorFlow, PyTorch, Scikit-learn
Concepts: OOP, Data Structures, Algorithms, Version Control

Professional Experience

Data Science Intern <i>APSSDC (Remote)</i>	May 2024 – June 2024
- Engineered a sentiment analysis model on 8,000+ restaurant reviews using TF-IDF features and Python classifiers. - Executed EDA, visualized sentiment trends, and evaluated models using precision, recall, and F1-score.	

Projects

Retrieval Augmented Generation with Summarization Chain <i>LangChain, Groq LLM, ChromaDB</i>	2025
- Architected a RAG-based system for academic PDF question answering, improving answer relevance by 25%. - Optimized 300+ pages using vector embeddings and optimized retrieval pipelines, reducing latency by 30%. - Integrated chunking and semantic search strategies to improve retrieval accuracy and efficiency.	
The Skeptical Researcher – Multi-Agent AI System <i>LLMs, LangChain, Multi-Agent Systems</i>	2025
- Devised a multi-agent AI system for automated research and structured report generation using LLMs. - Orchestrated retrieval, analysis, and validation agents to improve factual accuracy and reduce hallucinations. - Embedded modular AI pipelines for reliable reasoning, bias-aware analysis, and improved output quality.	
Image-Based Text Extraction and Entity Recognition <i>OCR, NLP, Machine Learning</i>	2026
- Developed an OCR-based system to extract and preprocess text from images for analysis. - Executed entity recognition to identify entity names and corresponding values from image-based text. - Utilized text cleaning, normalization, and rule-based matching to improve entity extraction accuracy.	
LLM-Powered Customer Churn Prediction & Insight System <i>Python, Machine Learning, LLMs, SHAP, NLP</i>	2026
- Constructed an ML-based churn prediction system to identify high-risk customers accurately. - Harnessed LLMs to generate actionable insights and explanations for churn patterns from structured data. - Strengthened feature engineering, model optimization, and SHAP-based explainability to improve model performance.	

Achievements

Qualified **GATE 2025 (CSE)** and solved **200+** DSA problems on LeetCode and Codeforces.

Certifications

Data Structures and Algorithms, Machine Learning – GoClasses, Great Learning • Analyzing Data with Python – IBM • AI for Everyone – edX • Deep Learning – Simplilearn SkillUp • APSSDC Certification (Edunet) • Tableau - Udemy
